

THE UNIFICATION PARTY
SUPPORTING IN UNITY : SERVING WITH HONOR

The Unification Party was formed to represent and defend the United States of America by creating a third majority party to unify all Americans. The Unification Party serves as the backbone of American Democracy by preserving the checks and balances of the constitution and the rule of law by electing people of integrity into public office. We believe in supporting all Americans through unity and serving all Americans with honor. The Unification Party of the United States is building a third majority party to ensure America will survive through the many real challenges and threats we face throughout our nation and around the world. We have established a new national party that has not been tainted by special interests or burdened by the pressures of political strife.

"We must step up to the challenges of the century that God has placed us in, and we must confront our fears and do what is right for all Americans. We only have one life and only one nation, and we must not let the 'Flag of Liberty' fall from us."

The Unification Party is committed to creating new economic opportunities by advancing American innovation and unifying all Americans together as we work to rebuild our economy and international sovereignty. We will create a new national campaign to buy only 'Made in America' products to ensure we are not building the economies of enemy states who are using our own economy against us. We will not only acknowledge but celebrate the service and self-sacrifice of our first responders, armed forces and our priceless veterans who must be treated honorably in times of peace and in times of war.

We will also end the political divide that has been destroying our nation and The Constitution for far too long. To ensure endless opportunities for all Americans we must stop supporting those representatives who are dedicated to expanding our nation's political divide by voting down party lines, there is no one 'party mold' that can contain the ideals of freedom and the endless possibilities Democracy grants to all Americans. The Unification Party will question those representatives who initiate to the floor of congress the same empty foreign policies and the same stale domestic agendas that do not relate to our new world. We need to reclaim the United States from those who take advantage of the power of the vote to further their own self-interests instead of the interests of the American people. Americans have become the eyewitness to a plague of current events which have been created by two parties hopelessly deadlocked, which are paralyzing our nation.

"For us to ensure endless opportunities for all Americans we must stop supporting those representatives who are dedicated to expanding our nation's 'political divide' by voting down party lines, there is no one 'party mold' that can contain the ideals of freedom, the light of liberty, and the endless possibilities Democracy grants to all Americans."

Every American can no longer afford to take the path of least resistance, while other nations work tirelessly to undo the foundation of our democracy. We give too much of our American blood to support and defend those that only wish to destroy us, and America has become weaker because we refuse to exercise the muscles of our nation's unchallenged military might, for fear of poor trade negotiations with countries who infiltrate and steal of our military secrets and sell our technological innovations to the highest bidder, while they nurture their own economy and extend the reach of their military capabilities.

"The greatest of military victories that any nation can achieve is to sow discord within its enemies' own people, as to have them turn against their brother's brother, to rend harm unto themselves, and lose the foundation of their civility, without ever having to fire a weapon, take a life or cross a border."

We have come to a turning point in American history where we must decide whose hands, we are placing the sovereignty of our nation. When there is a vacuum of leadership it opens old wounds which we thought were healed. Wounds of civil insurrection, anarchy, division and the 'fog of war' of conspiracy theories which tear apart the fabric of our nation.

During the Civil War the nation had to decide if we would coexist 'half slave and half free', during the Cold War we had to decide if we would exist 'half communist or half free', in this century we must decide if we are going to continue to exist. The decades of infighting between the two parties have slowly eroded the columned marbled halls of our democracy into dust; and a house divided against itself cannot stand. America must now decide how history will write our fate, whether this 'Great Experiment' will fall apart through two parties deadlocked in serving themselves out of greed and pride for privilege and party or place the fate of the nation in the hands of The Unification Party of The United States of America. A new party birthed by patriotism, unified through democracy, and baptized in freedom; a party unstained by corruption and the pride of voting down party lines, a party destined to serve with unburdened leadership that will bring about a new dawn of American justice and international sovereignty.

Americans throughout the nation are struggling needlessly, but they have continued to build our nation without praise and without thanks still believing in themselves and the American Dream.

"For us to ensure endless opportunities for all Americans we must stop supporting those representatives who are dedicated to expanding our nation's 'political divide' by voting down party lines, there is no one 'party mold' that can contain the ideals of freedom, the light of liberty, and the endless possibilities Democracy grants to all Americans."
